SABRE®
ARCHITECTURAL

SABRE
ARCHITECTURAL

As a brand, Sabre Hardware has been a part of the architectural construction supply landscape for over 40 years. Originally launched by Specialty Hardware in Sydney, Sabre became part of the family-owned Access Hardware Group in 2010, facilitating more product investment and development to meet changing market demands.

Our strategic partnerships with manufacturers in the United States, China, Taiwan and Australia have been a cornerstone of our ability to meet customer needs. We will continue to invest in these partnerships to deliver on our mission statement; to always strive to offer quality hardware solutions at the right price. Before a product is branded Sabre, it is rigorously tested to ensure it meets market expectations.

The Sabre product range covers common product categories such as door controls, locksets, entrance handles, general hardware and commercial washroom equipment. Sabre branded products are dispatched daily to all states and territories around Australia.

RIM NIGHT LATCH
LESS CYLINDER

The Sabre 550 Rim Night Latch is a simple to install, budget rim night latch. This is a perfect option for locking electrical cupboards and small storage areas. It can be used with most brands of round night latch cylinders on the market and comes complete with both inward and outward opening strike plates. The lock case and latch bolt are made from 304 stainless steel and are approved for use on 2hr fire door assemblies.

Note: Round cylinders are sold separately. We do however recommend installation with a genuine Sabre round cylinder.

SHORT BACKSET SWING DEADLOCKS
SUITABLE FOR ALUMINIUM AND METAL DOORS

Sabre's range of Short Backset Swing Deadlocks are suited for both hinged and sliding door applications. These deadlocks are generally used in commercial and architectural glazed stiles were a standard timber lock cannot be installed.

The range consists of the 590 Series which is used for hinged doors and the 591 Series which is used for sliding doors. The 590 Series has 2 sized bolt projections 22mm and 36mm whilst the 591 Series has a 28mm hooked projection to cater for the latching strike. All bolts are made of case hardened laminated steel.

- Standard 23mm backset
- 'R' cam compatible
- Case hardened laminated bolt
- Doors up to 58mm in thickness
- Oval cylinder escutcheons included
- Suitable for master keying and restricted keying

LOCK CYLINDERS

When it comes to securing a property with a mechanical keyed cylinder you can't ignore the quality of Sabre's lock cylinders. This range of precision engineered cylinders are made from quality materials ensuring low tolerances are achieved. This precise detailing ensures the security of the cylinder is maintained to the highest levels. All are compatible for use in numerous brands of locks and can be used with most inline restricted keying systems.

STRIKE PLATES
STANDARD AND EXTENDED

Often strike plates are misplaced or don't suit the frame detail required. Sabre has developed a range of standard and extended lipped strike plates to make it cost affective to replace or having a strike that may need to be custom made. The range includes standard lip sizes of 25.4mm and 32mm strike and extended lipped strikes ranging from 40mm up to 80mm in 10mm increments. All strikes are made from 1.5mm 304 stainless steel and come with 2 self-drilling fixing screws.
- Made from 1.5mm 304 stainless steel
- Standard 25.4mm and 32mm lipped strike plates
- Extended 40mm up to 80mm lipped strike plates
- Timber fixing screws supplied
